

Sword and Dagger rules Quick Reference Sheet

Play Sequence:

Each game turn is played in the following order;

(1) First Player moves his units and shoots with $\frac{1}{2}$ (rounded up) of his missile armed figures. The other Player shoots with $\frac{1}{2}$ (rounded down) of his missile figures.

(2) Both players calculate the result of any close combat.

This process is then repeated with the other player as First Player.

Movement Rates:

Units move as the owning player decides, at the following Movement Rates;

U-P infantry	8"	Rout/Charge 10"	Evade 4+d6"
LA-FA infantry	6"	Rout/Charge 8"	Evade 2+d6"
Courser/Nags	8"	Rout/Charge 16"	Evade 10+d6"
Rounseys	8"	Rout/Charge 18"	Evade 12+d6"

Half speed if Shooting, or crossing a low linear obstacle on foot.

Figures move at -1" per wound.

Count double distance of movement through difficult going or up a steep hill, or up a ladder.

Mounted figures move $\frac{1}{4}$ speed in woods.

Crossing obstacles over man height take a full move.

Figures may only charge to make contact with enemy figures, and may only evade to avoid contact by enemy.

Morale: Test when group;

- (1) Suffers a casualty.
- (2) Attempts to Charge/is being Charged.
- (3) Lord is Wounded or worse within 24".
- (4) Attempting to rally (before each Movement phase).

Throw 1d6:	+2: Lord with unit. : Group winning melee.
	+1: Knights form most of unit. : In cover/Uphill of nearest enemy.
	-1 : Being charged by greater numbers or better quality enemy ,or by better armed enemy. : Peasants form most of unit. : Per 25% of unit Killed, Disabled Wounded, Pushed back.
	-2: Group losing melee.
	-3 : Mounted , charging spears frontally.
	-4 : Routing.

Result:	1	May not advance toward enemy in next move.
	0	Attempt to Form line on any figure in the unit.
	-1	Fall back to form line on the rearmost figure in the unit, unless defending either a hilltop, wall or barricade etc
	-2+	Rout.

Handgun:	3"	12"	24"

Loading:

Loading times are as follows;

- Most weapons can load and fire in one turn.
- X-Bows/Staff slings, modern Handguns must spend 1 move stationary between shooting turns.
- Primitive Handguns must spend 3 moves stationary between shooting turns.

Ranges:	Short	Medium	Long
Bows/Staff slings:	8"	24"	48"
Crossbows:	10"	30"	60"
Slings:	10"	20"	30"
Hand hurled:	4"	10"	18"
Late Handgun	8"	16"	30"
Primitive Handgun:	3"	12"	24"

Shooting effect is calculated by an opposed roll between the target group and the shooter.

- (A) Shooters roll: 1d6; if peasant.
 1d8; if sergeant or better.
 -1 to roll per wound shooter has.

Targets roll: D8; Short range.
 D10; Medium range.
 D12; Long range.

And D6; if shielded or in cover/in contact and behind a shielded man.

- (B) Dice at this point to see which target group member is hit.
 (C) Calculate effect; if either target roll beats shooters roll, the shot misses.
 Otherwise, compare the highest target roll with the shooters roll on chart below.

Die roll difference	Target Armour class					
	U	P	LA	A	FA	
1	LW	-	-	-	-	-1 to difference if rock/sod. +1 to difference if Crossbow, Longbow or Staff sling.
2	LW	LW	-	-	-	
3	W	LW	LW	-	-	
4	W	W	LW	LW	-	Count all targets unarmoured if hit by Handguns.
5	K	W	W	LW	LW	
6	K	K	W	W	LW	
7	K	K	K	W	W	
8	K	K	K	K	W	
9+	K	K	K	K	K	

NB: If shooter scores a maximum on his dice, and the target throws a 1 on his Range die, the target is killed automatically.

Compare the modified results, the loser (and any unengaged figures in the way!) are pushed back 1 base depth (if possible). The loser also suffers the result below;

Armour class						+2 to difference if hit by Polearm or by charging mounted Lance/Spear. -1 to difference if hit by Dagger or by Improvised Weapon. NB: P/B = Push back 1 base depth NB: LW = Light Wound. W = 2 Light Wounds. K = Killed.
